

What does your Eden look like?

Definition of Eden- Paradise

Definition of Paradise- an ideal place or state

Definition of Ideal- Satisfying one's conception of what is perfect or most suitable

In other words, everything that God created in the beginning was Eden to God. It was exactly as it was conceived in the mind of God. In the book of Genesis, as it is written, everything God created was GOOD, until it was no longer good.

Now think back to a time when things were good. What did good look like? Write it in the box below

What turned good into Bad? Write it in the box below

What made that thing(s), bad? Could it be your perception of that, turned into conception of that?

Remember, as defined above, what is ideal is conceived. The word ideal originates from idea which is a thought or suggestion or it could mean the aim or purpose of something.

Just maybe the garden of Eden was tainted by the knowledge of good and evil, which is the Tree that God told Adam NOT to eat from. Maybe, the knowing of evil, turns into perception, which will then bring in to light (conception) that "thing(s)." Something like your thoughts (what is hidden) coming into fruition (that which you can see).
